PG DEPARTMENT OF PHYSICS

INDUSTRIAL VISIT TO CECRI, KARAIKUDI

REPORT

On 26th September 2022, 20 students of PG Physics along with 3 faculty members of PG Department of Physics visited CSIR-Central Electro Chemical Research Institute, Karaikudi-630003. All the students actively participated in the visit to CECRI and it was successfully coordinated by the department faculties viz Dr. P.P. Kannan, Dr. A. Amudhavalli and Dr. S. Christopher Jeyaseelan. This visit was mainly focused on to understand the procedures and techniques involved in observing the chemical research, and to know about the equipments and devices used in the CSIR-CECRI. Our students visited various labs such as Electrochemical work station, Electrochemical power source division, Electroplating and metal finishing, Electrochemical Process Engineering, Electro organic and Materials Electrochemistry. Students interestingly attended the poster presentation session, which was presented by the research scholars of CSIR-Central Electro Chemical Research Institute. Our students also learned a few characterization techniques in the field of chemical research and also clarified their doubts in the demonstration session. The visit came to an end at 3.00 p.m.

Dr.S.RAMASWAMY
Head of the Department
